

# SCRAM<sup>®</sup>

REMOTE BREATH

The most flexible option  
in breath alcohol testing

A portable device with automated facial  
recognition and GPS with every test.

**SCRAM Remote Breath<sup>®</sup>** is a handheld, mobile, wireless breath alcohol device for scheduled, random, and on-demand tests. For your lower-risk clients or those who have earned less intensive monitoring.

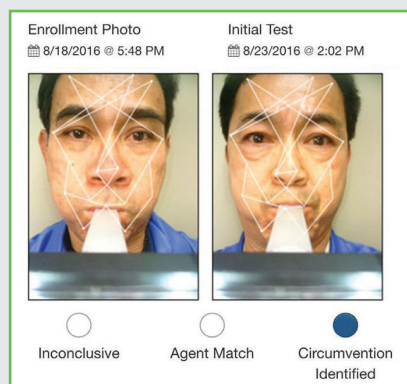

## Features

- Immediate notification of BrAC and positive client ID
- Ethernet capability enables enrollment anywhere Internet is available
- GPS location with taken **and** missed tests
- Device-initiated testing—automatically turns on and prompts clients to test
- Flexible testing schedules
- STORE & FORWARD saves test results when unit is out of cellular coverage
- Optional client text reminders
- Rugged, built for corrections—more time in the field, less time getting replaced
- Proven fuel cell technology
- Portable, easy to carry, easy to use

## Automated Facial Intelligence<sup>™</sup> (AFI<sup>™</sup>) Decreases Manual Photo Review by 90–95%

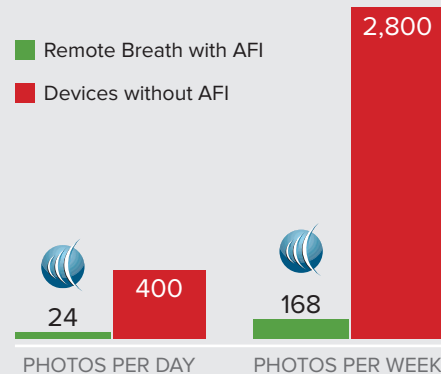

- Government security-grade facial recognition software—not just photos
- Real-time notifications with automated, simultaneous client verification
- Significantly reduces the staff time required to review and confirm client IDs
- High resolution camera ensures clear photos for the 5–10% you do need to review
- Smart technology further reduces alerts by automatically prompting clients to correct poor testing photos

### AFI Catches Circumventions

AFI caught mismatched photos. Client admitted to having cousin take his scheduled test while he was drinking.

### Workload Reduction With AFI

Industry comparison of manual photo matching in an average program.

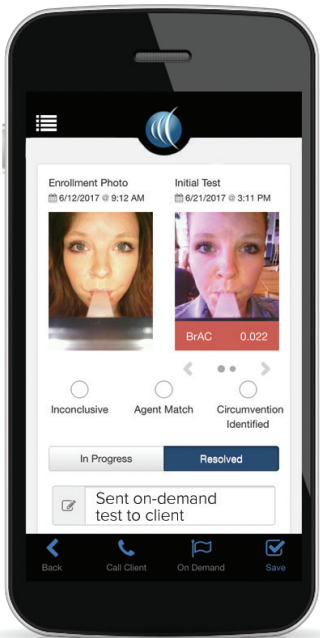

# Simplify Client Management with Integrated Software and Mobile Solutions

## Unified Workload and Reporting

SCRAMNET Optix™ brings together all of your electronic monitoring clients in one user experience

Integrated reporting illustrates key program metrics, turning data into insights

SCRAM Advanced Program Analytics provide in-depth, configurable analysis of your program's health

## Mobile Client Management

Manage Remote Breath clients anytime, anywhere with the SCRAMNET Mobile™ app

Instant notification of alcohol events, missed tests, and attempted circumventions

Resolve alerts, add notes, and send on-demand breath tests on-the-go, 24/7

Call clients with a single tap and view a client's address or testing location in Google Maps

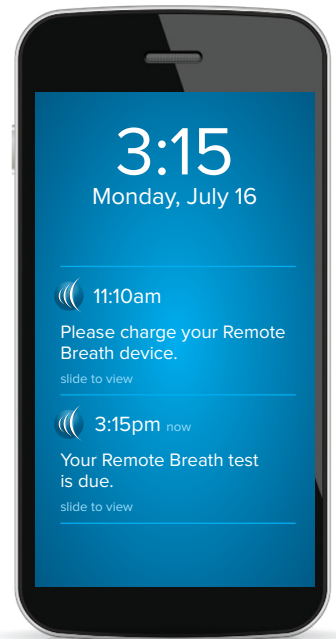

## Dynamic Client Engagement Tools

The SCRAM client mobile app provides a better way to manage common interactions with clients

Secure, two-way messaging between the client smartphone app and the SCRAMNET Optix agent dashboard

Automated EM reminders improve client compliance and accountability

Add another layer of supervision with configurable, mobile check-ins
